- of which sugars (g)	5.05	<0.01
Proteins (g)	0.50	<0.01
Salt (g)	<0.1	<0.01

BeeGlueNose spray contains propolis extract which has antimicrobial, antibacterial, antifungal, antiviral and immunostimulating effects in cases of inflammation of the nose and upper respiratory tract, flu, or cold, while at the same time improving the body's defense mechanisms. Tannic acid reacts with the proteins of the surface layers of the nasal mucosa, resulting in insoluble complexes that precipitate and as an end result have an astringent effect. This leads to the removal of the increased amount of secretions from the nasal cavities. Tannic acid also reacts with the proteins of bacteria, fungi and viruses and thus exhibits antibacterial, antifungal and antiviral effects. Eucalyptus essential oil facilitates breathing and has an antiseptic effect.

Due to the product's antiseptic and astringent effects, recommended uses include use:

- by individuals with obstructed airways
- in cases of cold or runny nose
- in cases of respiratory tract infections
- in case of sinusitis

Ingredients: Aqua, Polysorbate 20, Propylen Glycol, Tannic Acid, Propolis Extract, Citric Acid, Potassium Sorbate, Sodium Benzoate, Eucalyptus Globulus Oil.

Usage: Spray one dose of the solution into each nostril two to three times a day (as needed). Thanks to the mechanical spray pump that is part of the product, it is possible to evenly distribute the product onto the nasal mucosa as the pump allows formation of very tiny droplets.

Notes: For hygienic reasons, each individual should use their own person bottle of solution. The solution should be shaken before use.

The recommended daily intake must not be exceeded. Shake before use.

Keep out of reach of children.

Warnings: Keep out of reach of children. The use of product in case of hypersensitivity to any of the ingredients is not recommended.

Packaging: Bottle with 30 ml of solution with dosage spray (300 doses).

Storage instructions: Keep the product in its original packaging, in a dry and dark place, at a temperature of up to 25°C.

Shelf life: 3 years. The date of manufacture and serial number are printed on the packaging. After opening the bottle, use up the solution within 30 days.
