

Venoton vein spray

with standardized wild chestnut extract

Ingredients (INCI): Aqua, Alcohol, Glycerin, PEG-40 Hydrogenated Castor Oil, Aesculus Hippocastanum Extract, Hamamelis Virginiana Distillate, Propylene Glycol, Aloe Barbadensis Leaf Juice, Mentha Piperita Oil, Citrus Medica Limonum (Lemon) Oil Peel Oil, Phenoxyethanol, Sodium Hydroxide, Salix Alba Bark Extract, Decyl Glucoside, Carbomer, Allantoin, Ethylhexylglycerin, Lavandula Hybrida Oil, Disodium EDTA.

VENOTON vein spray is intended for the treatment of tired legs and rubbed veins. It contains herbal extract of wild chestnut seeds standardized to 1.4% escin, extracts of white willow bark, aloe and witch hazel, as well as essential oils of lavender and lemon.

Escin, a triterpene glycoside isolated from the seeds of the wild chestnut (*Aesculus hippocastanum*) is used to aid in the treatment of varicose veins and venous insufficiency. It has vasoprotective and antiedematous properties, acts to prevent the accumulation of water in the tissues and local swelling of the tissues that causes a feeling of heaviness and tension. Topical application of escin preparations improves microcirculation, increases resistance in capillaries, and restores skin elasticity.

To achieve the best results in the treatment of peripheral venous and lymphatic circulation damage, escin is used in combination with other plant extracts. Witch hazel, rich in tannins, has an astringent, antiseptic effect and contributes to calming inflammatory processes. Willow bark extract is a natural source of salicin, which has an anti-inflammatory effect. Aloe vera maintains the skin's natural moisture, while the active principles of lavender have a soothing effect, locally at the application site. Lemon essential oil has an antioxidant effect, strengthens the capillary wall and prevents them from bursting.

VENOTON vein spray does not cause skin irritation and damage. It is easy to apply, penetrates quickly and acts immediately after application.

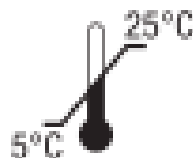

- **in the treatment of varicose veins**
- **in tired and swollen legs**
- **in muscle cramps**

How to use: Spray the foot twice a day and, if necessary, spread with light, circular movements from the fingertips upwards, until completely absorbed. In order to achieve the effect of improving circulation and reducing swelling, it is recommended to sleep with slightly raised legs.

Note: It is not recommended to use in case of hypersensitivity (allergy) to any of the ingredients of the preparation.

Content: 100 ml

Storage instructions:

Store at temperatures up to 25°C, out of reach of children.

Shelf life: 2 years..
